AI Ethics: ReconX provides full transparency into AI decisions via the "SAYA AI Ethics" button. You can always see WHY the AI made a particular suggestion.

Status Values

Status	Meaning	Action	Color
OPEN	Record not yet reconciled	Run reconciliation or manually link	● Yellow
RECONCILED	Record successfully matched	No action needed	● Green
SENT TO RESOLVEX	Forwarded for exception handling	Handle in ResolveX workspace	● Blue

Action Terms (with Icons)

Action	Icon	What It Does
Reconcile	FactCheckOutlined	Executes the matching engine to automatically find and link matching records, typically reducing manual work by 80%
Link	🔗 AddLinkOutlined	Manually connect records that belong together with audit trail
Delink	🔗 LayersClearOutlined	Remove connection between previously linked records (with mandatory notes)
Send to ResolveX	🚩 AddToQueue	Forward unmatched/problematic records to exception workflow
Download	⬇️ DownloadForOfflineOutlined	Export data to CSV for offline analysis
Upload	⬆️ FileUploadOutlined	Import data files into the system
View/Edit Rules	⚙️ AppRegistrationOutlined	Open rule configuration dialog
Recon Optimizer	✍️ BlurLinear	Run AI to optimize matching rules
ATC	BrightnessAutoOutlined	AI calculates optimal tolerance values
Back	⬅️ KeyboardBackspace	Return to main workspace view
