Troubleshooting

Troubleshooting

Access Control: Cannot See Admin Menu

Actions

Access Control: Cannot Create Users

Actions

Configuration: Cannot Delete Organisation

Actions

Configuration: Cannot Delete Department

Actions

User Management: Username Already Exists

Actions

User Management: Logo Not Displaying

Actions

Expected Behaviors

Organisation Cannot Be Changed After User Creation

Department Head Cannot See Other Departments

Contacting Support

Access Control: Cannot See Admin Menu

User cannot see the Admin menu option in the navigation.

Actions

1. Verify assigned role via Settings > Profile
2. Check if role has **PlatformX Manage** or **PlatformX Modify** permissions
3. Contact Client Admin to upgrade role if needed
4. If issue persists, see Contacting Support

Access Control: Cannot Create Users

Create User button is disabled or missing from Users screen.

Actions

1. Verify role has `users.create` permission
2. Only Client Admin and above can create users
3. Contact Client Admin to adjust role permissions
4. If issue persists, see [Contacting Support](#)

Configuration: Cannot Delete Organisation

Delete action fails or is disabled when attempting to remove an organisation.

Actions

1. Check for dependencies:
 - **Users** - Reassign or delete users first
 - **Processes** - Remove Ops Processes and workflows
 - **Data Sets** - Delete associated data configurations
2. Remove all dependencies before attempting deletion
3. If unsure what depends on the organisation, see [Contacting Support](#)

Configuration: Cannot Delete Department

Delete action fails when attempting to remove a department.

Actions

1. Navigate to **Admin > PlatformX > Users**
2. Filter users by the department
3. Reassign all users to another department
4. Return to Departments and retry deletion
5. If issue persists, see [Contacting Support](#)

User Management: Username Already Exists

User creation fails with "username already exists" error.

Actions

- Choose a different username (must be globally unique)

- Check if user was previously created and deactivated
- If you need to reuse the email, update the existing user instead

User Management: Logo Not Displaying

Organisation or Service Provider logo upload succeeds but image doesn't display.

Actions

1. Verify image format:
 - Accepted: PNG, JPG, SVG
 - Max size: 1MB
 - Recommended dimensions: 100x100 pixels
2. Clear browser cache and refresh
3. Re-upload using smaller file if needed
4. If problem continues, see [Contacting Support](#)

Expected Behaviors

Organisation Cannot Be Changed After User Creation

Once a user is created, their organisation assignment is immutable.

Why: Organisation determines data scope and access boundaries. Changing it after creation could cause security and data integrity issues.

Solution: Create a new user under the correct organisation if assignment is wrong.

Department Head Cannot See Other Departments

Department Heads can only view and manage users within their assigned department.

Why: By design for data segregation and security.

Solution: Upgrade role to Operations Head for cross-department visibility, or contact Operations Head for assistance.

Contacting Support

If the issue persists after following troubleshooting steps, contact your Client Admin or SAYA Support with:

- The time the issue occurred
- What action you were performing
- Screenshots showing the issue or error message
- Username and organisation name
- Relevant entity names (user, role, department, organisation)
