Overview

The ResolveX Workspace is where daily exception handling happens. Operations users process items through workflow queues using standardized actions while maintaining audit trails.

Quick Start (15 minutes)

Use this guided flow if you are new to ResolveX and want to process your first item end-to-end.

Before you start (Prerequisites)

Make sure the following are ready:

- An **Ops Process** exists.

- At least one **Workflow** is mapped to that Ops Process.
- Your user role is mapped to the workflow, queues, and actions you need.
- Items are already entering ResolveX (for automated exception generation, confirm failed matches are configured to be sent from ReconX to ResolveX).

Step 1: Select Ops Process and Workflow

1. Navigate to **Dashboard > ResolveX > Workspace**
2. Select the **Ops Process**
3. Select the **Workflow**

Expected outcome: **Queue tabs appear with item counts.**

Step 2: Choose a queue and open an item

1. Click a queue tab (e.g., **New Cases** or **Under Review**)
2. Double-click a row to navigate to the **Item Detail page**

Expected outcome:

- The **Item Detail page** opens showing the context header: **Ops Process, Workflow, Queue, and Item ID.**
- **Record data, actions, notes, attachments, automation activity, and audit history** are available as expandable sections.

Step 3: Take action (with User Notes)

1. In the detail page header, click the **Actions ⚡** dropdown menu
2. Select the desired action (e.g., **Assign, Request Info, Approve, Reject**)
3. Enter **User Notes** explaining your decision
4. Click **Confirm**

Expected outcome:

- **The item moves to the action's target queue.**
- **Your notes become part of the audit trail.**

Step 4: Add evidence (Notes / Attachments)

1. Add a note for additional context
2. Upload supporting attachments (if enabled for the workflow)

Expected outcome: **Notes and attachments are visible to other users working the item.**

Step 5: Verify audit trail

- 1. Open the **Audit** section in the item details view
- 2. Confirm queue moves, actions, timestamps, and user notes are recorded

Accessing the Workspace

- 1. Navigate to **Dashboard > ResolveX > Workspace**
- 2. Select an **Ops Process** from the dropdown
- 3. Select a **Workflow** from the available workflows

Workspace Layout

Ops Process ▼

Workflow ▼

[i] [+ Add Form]

Queue Tabs: New Cases (15) | Under Review (8) | Pending Approval (3)

ITEMS TABLE

Case ID	Created Date	Status	(custom columns per source)
12345	2024-12-01	OPEN	...
12346	2024-12-01	IN PROG	...

Double-click row → navigates to Item Detail page (separate full page)

Component Reference

Component	Purpose
Ops Process Selector	Choose which Ops Process provides the items for this workflow
Workflow Selector	Choose the workflow to view and work on

Component	Purpose
Info Button (📄)	Opens the Automation Configuration popover for the selected workflow (visible when a Workflow is selected)
Add Form Button	Opens a form to manually add a new item to the workflow (availability depends on Ops Process configuration)
Queue Tabs	Switch between different queues in the workflow (shows item count)
Items Table	Main table showing items in the selected queue
Item Detail Page	Opens on double-click — full-page view for a single item with header context, actions, and data sections

Workspace Toolbar

The toolbar appears above the queue tabs. It contains the Ops Process and Workflow selectors on the left, and action buttons on the right:

Button	Behaviour
Info (📄)	Opens the Automation Configuration popover for the selected workflow. Shows the workflow process details and any configured automation rules and events. Only visible when a Workflow is selected.
Add Form (➕)	Opens a form to manually add a new work item to the workflow. Availability depends on Ops Process configuration and your role permissions.

Queue Tabs

1. Each tab shows the **queue name** and **item count** in parentheses
2. Example: New Cases (15) | Under Review (8) | Pending Approval (3)
3. Click a tab to view items in that queue
4. Item counts update as users process items

Records Table

The table displays items in the selected queue:

- **Sortable columns** - click column header to sort
- **Column filters** - filter within specific columns (if enabled)
- **Virtualized scrolling** - handles large datasets efficiently

- **Double-click row** - opens item details

Item Detail Page

Double-clicking a row navigates to the **Item Detail page** — a dedicated full page for a single work item.

Detail Page Header

The header card at the top of the page shows context and provides actions:

Ops Process: [name] | Workflow: [name] | Queue: [name] | Item #id |
[i] [...] [← Back]

TEXT

Element	Purpose
Ops Process	Name of the Ops Process this item belongs to
Workflow	Name of the workflow being used
Queue	The queue the item was opened from
Item #id	The unique record identifier
Info 	Opens the Automation Configuration popover for this workflow
Actions 	Dropdown menu of available workflow actions and the Follow-up email option (visibility depends on your role)
Back 	Returns to the workspace list (highlighted button)

Detail Sections

Below the header, item data is organised into collapsible accordion sections:

Section	Contents
Record Details	All fields from the original record, with tabs to switch between data sources
Notes	List of notes with Add Note option (if enabled for the workflow)
Attachments	List of attachments with Add Attachment option (if enabled for the workflow)
Automation Activity	History of all automated actions (rules and events) executed for this item

NOTE

NOTE

Audit history (queue moves, actions, timestamps, and user notes) is accessible from within the **Record Details** section.

Performing Actions

To take action on an item:

1. Double-click the row in the workspace to open the **Item Detail page**
2. Review the item data in **Record Details**
3. Click the **Actions ⚡** dropdown menu in the detail page header
4. Select the desired action (e.g., Assign, Request Info, Approve, Reject)
5. Enter **User Notes** (required) explaining your decision
6. Click **Confirm**

A modal dialog box titled "User Notes" with a close button (X) in the top right corner. It contains a large text input field with the placeholder text "Required necessary actions". At the bottom right, there are two buttons: "Cancel" and "Submit".

The item moves to the action's target queue. You are returned to the workspace list.

Adding Notes

1. Open item details
2. Expand the **Notes** section
3. Click **Add Note**
4. Enter your note text
5. Click **Save**

Notes are timestamped and show who added them.

NOTE

The note input is limited to 500 characters in the UI.

Adding Attachments

1. Open item details
2. Expand the **Attachments** section
3. Click **Add Attachment**
4. Select a file
5. Click **Upload**

NOTE

- Maximum file size: 10 MB
- Allowed file types: PDF, TXT, JPG/JPEG, PNG, DOC, DOCX

Downloading Attachments

1. Open item details
2. Expand the **Attachments** section
3. Locate the attachment
4. Click the **Download** action/icon

Sending Followup Emails

1. Open the **Item Detail** page (double-click a row)
2. Click the **Actions** ⚡ dropdown menu in the detail page header
3. Select **Follow Up** (if enabled for this workflow and your role)
4. Enter:
 - **To Address**
 - **Subject**
 - **Message**
5. Click **Send**

A modal form titled "Follow Up Email" with a close button (X) in the top right corner. The form contains three input fields: "Email Address", "Subject", and "Message". The "Message" field is a larger text area with a small icon in the bottom right corner. A pink "SEND" button is located at the bottom right of the form.

Follow Up Email

Email Address

Subject

Message

SEND

Viewing Audit Trail

1. Open item details
2. Expand the **Audit** section
3. Review:
 - Action Name
 - From Queue → To Queue
 - User Name
 - User Notes
 - Created Date

Automation Configuration

The **Automation Configuration** popover shows workflow-level automation details. It is accessible from two places:

- The **Info**  button in the workspace toolbar (when a Workflow is selected)
- The **Info**  button in the **Item Detail** page header

The popover displays the workflow process configuration, including any rules and events attached to the workflow. This is a read-only view intended to help operations users understand what automations may affect items they are processing.

Data Source Tabs

For Ops Processes with two data sources:

- Toggle between **Data Source 1** and **Data Source 2**
- Each source may have different items in the workflow
- Queue item counts can differ per source
- The item count shown on each queue tab is the combined total across available data sources

Pagination

The workspace supports pagination:

- Default: 500 records per page
- Options may include: 100, 500, 1000 records per page
